

CampusPoint

Software Application Configuration Technician

- Perfect opportunity for a recent graduate looking to take their first steps to get their career started.
- This position will be paying \$17-\$19/hr to start.
- To learn more or apply today go to www.CampusPoint.com or email Hirav at hirav@campuspoint.com.

Join a dynamic software development team working on innovative web-based application in one of the hottest markets in the industry – electronic healthcare research!

Ideal candidates will have a Bachelor's degree in Computer Science, but other tech degrees are okay as long as you have experience and familiarity with web technologies, database, and programming.

Role:

Participate, as a member of an application deployment team, in configuration of the products for the customers. Using the products and configuration tools, this role will perform some or all of the following in adapting, configuring, and preparing a customer's site:

- Form design and implementation using the technology
- Workflow adaptation and configuration to accommodate a customer's specific process and workflow.
- Application testing: functional, user interface, performance, and security testing.

Ideal Skills:

The role involves extensive use and configuration of state-of-the art web application tools. As such, familiarity and some experience with the following is ideal:

- College project or work experience in applications, web technologies (html, built a website, etc), forms based design.
- Programming concepts and some programming experience is ideal (Java or C#)
- Familiar with scripting: javascript
- Courses in Database Management Systems/SQL
- Personal initiative and problem solving skills

Compensation:

\$17-\$19/hr to start. Can transition to \$20/hr or above at 3 month review pending performance and results.
